

## Good Practice in Revalidation, Portfolios & PDP's for Doctors

Although Revalidation is very much upon all Trusts now, many doctors do not understand what is involved and what is specifically expected of them. This workshop is designed to bring them right up to date and explores not only the requirements of the five year cycle, but also offers practical perspectives to support doctors to build comprehensive portfolios that meet the required criteria.

By the end of the half day★ workshop, delegates will be able to :

- Understand where Revalidation and Appraisals fit within the GMC licensing requirements
- Collect and appropriately map supporting information for appraisals that meets the twelve attributes outlined in the four Domains
- Draft appropriate objectives to include in their Personal Development Plan

Outline Programme:

- The benefit of appraisals for the individual doctor, the patient, the team and the employing organization
- The revalidation process
- The framework for Appraisal and Assessment
- The Good Medical Practice Framework, structure and what the implications are
- Building a Portfolio; supporting information, collecting and organizing the six groups of evidence
- The role and responsibilities of the Appraiser and the Responsible Officer
- Developing a Personal Development Plan

NB: Employing organization documentation can be integrated into this workshop if required.
